Plano, Texas, 75074 | Data Engineer & Analyst | 469-512-0058 | Yaseenam3@gmail.com | linkedin.com/in/yaseenam

EDUCATION

The University of Texas at Dallas

May 2026

Master of Science, Business Analytics and Artificial Intelligence

The University of Texas at Dallas

December 2023

Bachelor of Science, Data Science

SKILLS

- **Programming:** Python, R, SQL, Scala, Java, C++, HTML/CSS, JavaScript
- **Data Science:** Statistical Analysis, Machine Learning, NLP, Fraud Pattern Detection, Feature Engineering, Data Transformation & Visualization, Regression & Hypothesis Testing
- **Analysis Tools:** RStudio, Scikit-learn, Spark, Hadoop, MySQL, MongoDB, PowerBI, Tableau, MS Excel
- **Data Infrastructure:** AWS, Azure, Cosmos DB, Snowflake, Oracle, Blob Storage
- **Certifications:** AWS Certified Machine Learning, Microsoft Azure Data Scientist Associate

PROFESSIONAL EXPERIENCE

Data Engineer | Zinzu, Redmond, WA

March 2024 - Present

- Engineered data infrastructure using Azure SQL, NoSQL, and Cosmos DB to support 70% of operational data, enabling scalable and queryable datasets for analytical investigations.
- Integrated NLP analytics using GPT API to parse free-form text fields and derive structured insights from unstructured data sources.
- Engineered SQL queries to extract statistics and insights from large-scale web datasets, supporting data-driven decision-making.
- Optimized big data processing by implementing Apache Spark, reducing server latency and improving throughput for data-intensive workflows.

Business Analyst | Standard Aero, Dallas, TX

February 2025 - August 2025

- Designed and implemented robust data pipelines between Snowflake and Oracle databases using advanced SQL transformations to prepare large datasets for reporting and analytics.
- Applied predictive statistical techniques to forecast KPIs, identifying performance deviations and supporting evidence-based financial reporting.
- Enhanced financial visibility by integrating quarterly budgets and dynamic KPIs into Power BI dashboards, delivering insights into company financial health.
- Collaborated cross-functionally to translate complex business requirements into quantitative reporting solutions for technical and non-technical stakeholders.

Data Scientist Intern | Autix Automotive, Dallas, TX

August 2023 - December 2023

- Developed NLP-based text extraction workflows using GPT API, converting unstructured data into structured datasets and boosting predictive power by 30%.
- Improved ML model accuracy by 70% using Scikit-learn, XGBoost, and ensemble methods to detect anomalous pricing patterns across car market segments.
- Built end-to-end data pipelines for web scraping, cleaning, and storage in Azure Blob Storage, ensuring scalable and reliable data for downstream analysis.
- Engineered custom ML models segmented by price tier, enabling precise, targeted pattern detection across heterogeneous datasets.

Data Science Intern | Vital Synapses, Dallas, TX

May 2023 – August 2023

- Created a data pipeline for processing healthcare insurance claims, automating extraction, cleaning, and transformation to support fraud and delay pattern analysis.
- Applied statistical methods including regression and hypothesis testing to diagnose lead time anomalies across 70% of insurance claims, uncovering root causes of delays.
- Developed 10+ Power BI dashboards visualizing relationships between claim processing times and clinical factors, surfacing patterns for stakeholder review.
- Addressed incomplete and inconsistent data through targeted imputation techniques using linear regression, ensuring dataset integrity for downstream analytics.
