Plano, Texas, 75074 | Data Engineer & Analyst | 469-512-0058 | Yaseenam3@gmail.com | linkedin.com/in/yaseenam

EDUCATION

The University of Texas at Dallas

May 2026

Master of Science, Business Analytics and Artificial Intelligence

The University of Texas at Dallas

December 2023

Bachelor of Science, Data Science

SKILLS

- **Certifications:** AWS Certified Machine Learning, Microsoft Azure Data Scientist Associate
- **Programming:** Python (NumPy, SciPy, Scikit-learn), SQL (MySQL, Microsoft SQL), R, Scala, C++, JavaScript
- **Analysis & ML Tools:** Scikit-learn, XGBoost, Machine Learning, Feature Engineering, NLP, Statistical Analysis, Exploratory Data Analysis
- **Data & Visualization Tools:** PowerBI, Tableau, Spark, Hadoop, MySQL, MongoDB, MS Excel, Jupyter
- **Cloud & Infrastructure:** Azure (SQL, NoSQL, Cosmos DB, Blob Storage, Monitor), AWS, GitHub CI/CD, MLOps

PROFESSIONAL EXPERIENCE

Data Engineer | Zinzu, Redmond, WA

March 2024 - Present

- Engineered scalable data infrastructure using Azure services (SQL, NoSQL, Cosmos DB, Blob Storage) supporting 70% of operational data, improving processing efficiency and system scalability.
- Automated backend maintenance processes using Bash scripts and Azure Monitor, reducing manual task time by 70% and enabling continuous deployment via GitHub integration.
- Optimized big data processing by implementing Apache Spark, improving throughput and reducing server latency for large, complex datasets.
- Integrated natural language analytics using GPT API to generate custom data insights, enabling adaptive and user-driven analytical workflows.

Business Analyst | Standard Aero, Dallas, TX

February 2025 - August 2025

- Developed and maintained Power BI dashboards for cross-departmental KPI reporting, enabling data-driven decision-making for leads and senior management.
- Designed and implemented robust data pipelines between Snowflake and Oracle databases using advanced SQL transformations to prepare data for analytics and reporting.
- Applied predictive statistical techniques to forecast KPIs, ensuring alignment with organizational performance goals and supporting evidence-based decision-making.
- Collaborated with multiple departments to gather business requirements and translate them into actionable, automated reporting solutions.

Data Scientist Intern | Autix Automotive, Dallas, TX

August 2023 - December 2023

- Improved predictive ML model accuracy by 70% using Scikit-learn, XGBoost, and ensemble methods for car price prediction, applying feature engineering and data reduction techniques.
- Developed NLP-based text extraction workflows using GPT API, converting unstructured data into structured features, boosting dataset predictive power by 30% and saving \$80K in external software costs.
- Built automated data pipelines for web-scraped data collection, cleaning, and storage in Azure Blob Storage, ensuring scalability and reliability for ML workflows.
- Engineered custom ML models segmented by price tier, applying feature selection and model tuning to deliver targeted, precise predictions across diverse datasets.

Data Science Intern | Vital Synapses, Dallas, TX

May 2023 – August 2023

- Developed 10+ Power BI dashboards visualizing relationships between healthcare insurance claim processing times and clinical factors, enabling stakeholders to identify bottlenecks.
- Applied statistical methods including regression and hypothesis testing to diagnose claim lead times for 70% of insurance records, uncovering root causes of processing delays.
- Created a data pipeline automating extraction, cleaning, and transformation of healthcare claims data, reducing manual processing and improving analytics scalability.
- Resolved data inconsistencies through tailored imputation techniques using linear regression, ensuring reliable and standardized datasets for downstream analysis.
