Plano, Texas, 75074 | Data Engineer & Analyst | 469-512-0058 | Yaseenam3@gmail.com | linkedin.com/in/yaseenam

EDUCATION

The University of Texas at Dallas

May 2026

Master of Science, Business Analytics and Artificial Intelligence

The University of Texas at Dallas

December 2023

Bachelor of Science, Data Science

SKILLS

- **Certifications:** AWS Certified Machine Learning Specialty, Microsoft Azure Data Scientist Associate
- **AI & Machine Learning:** LLMs, Prompt Engineering, GPT API, RAG Pipelines, NLP, Scikit-learn, XGBoost, Feature Engineering, Model Evaluation
- **Programming:** Python, SQL, R, Scala, Java, C++, JavaScript
- **Frameworks & Tools:** Hugging Face, OpenAI APIs, Pandas, NumPy, Apache Spark, Hadoop, PowerBI, Tableau
- **Cloud & Data Infrastructure:** Azure AI (Cosmos DB, Blob Storage, Azure Monitor), AWS Bedrock, MongoDB, MySQL, Snowflake

PROFESSIONAL EXPERIENCE

Data Engineer | Zinzu, Redmond, WA

March 2024 - Present

- Integrated GPT API-powered natural language analytics into the platform, enabling user-friendly, adaptive data insights and demonstrating hands-on LLM application development.
- Engineered data infrastructure using Azure services (SQL, NoSQL, Cosmos DB, Blob Storage) to support 70% of operational data, improving scalability and deployment reliability.
- Optimized big data processing by implementing Apache Spark, reducing server latency and improving pipeline throughput for AI-ready data workflows.
- Automated backend server maintenance using Bash scripts and Azure Monitor with GitHub CI/CD integration, reducing manual task time by 70%.

Business Analyst | Standard Aero, Dallas, TX

February 2025 - August 2025

- Designed and implemented robust data pipelines between Snowflake and Oracle using advanced SQL transformations, preparing structured datasets for analytics and ML workflows.
- Applied predictive statistical techniques to forecast KPIs, aligning model outputs with business performance goals and demonstrating model evaluation practices.
- Developed and maintained Power BI dashboards with dynamic KPIs, enabling data-driven decision-making across multiple departments.
- Collaborated cross-functionally with product, engineering, and operations teams to translate business requirements into scalable reporting and analytics solutions.

Data Scientist Intern | Autix Automotive, Dallas, TX

August 2023 - December 2023

- Developed NLP-based text extraction workflows using GPT API to convert unstructured car descriptions into structured training data, boosting dataset predictive power by 30% and saving \$80K in external software costs.
- Improved ML model accuracy by 70% using Scikit-learn, XGBoost, and ensemble methods to optimize car price prediction models across multiple price segments.
- Built end-to-end data pipelines for web-scraped data collection, cleaning, and storage in Azure Blob Storage, supporting scalable model training and reproducibility.
- Led a team through data preprocessing, feature engineering, and model development, ensuring efficient collaboration and structured execution of the AI pipeline.

PROJECTS & EXTRACURRICULARS

ASA Data fest 2023

- SMU | March 2023
- Awarded 3rd place at ASA DataFest 2023 for analyzing 10GB of data across 8 datasets, performing exploratory data analysis (EDA) in R using heatmaps and distribution graphs to uncover location-specific trends.
- Built a multiple linear regression model leveraging NLP-extracted features, achieving 90% accuracy in predicting pro bono case success rates based on response times and urgency indicators.
- Managed large-scale dataset segmentation and visualization to surface actionable insights, demonstrating structured problem-solving and analytical thinking under competition conditions.
